

HEIN, LEHMANN

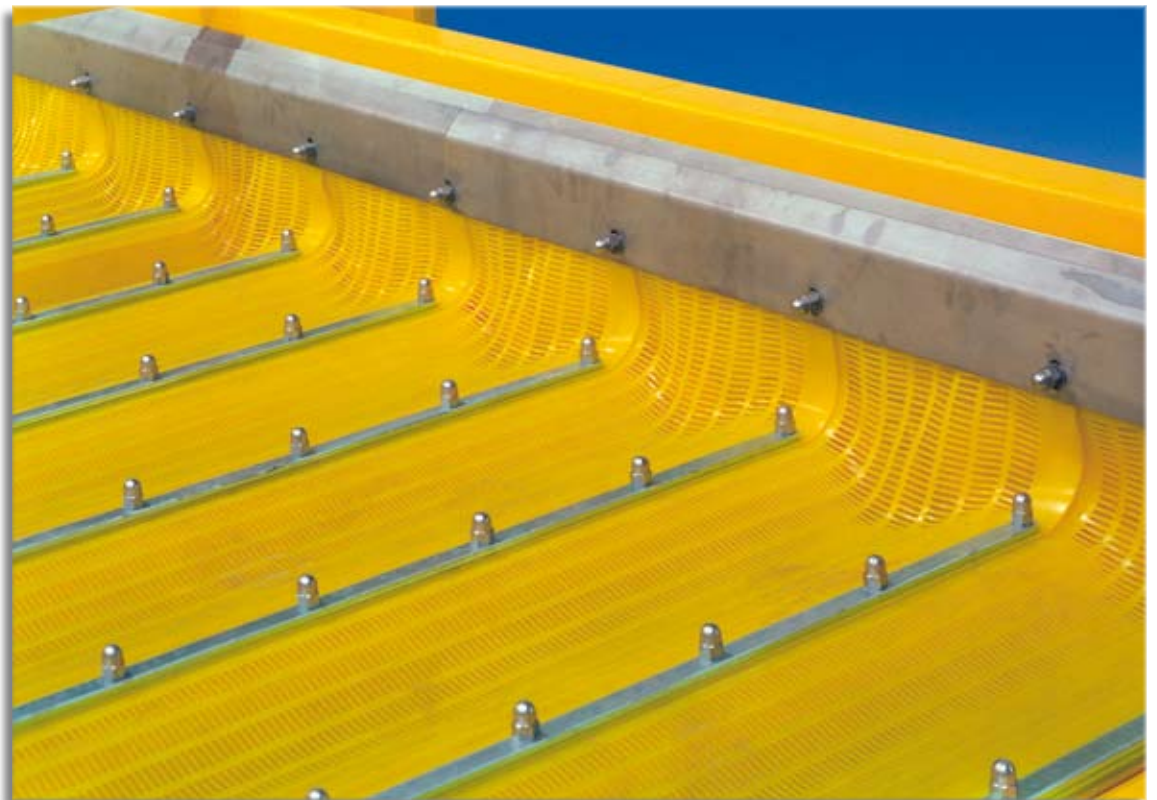

TRENN- UND FÖRDERTECHNIK GMBH

The new lateral sealing for LIWELL® - screening machines developed by HEIN, LEHMANN prevents oversize material in the screen underflow and protects the side walls against wear.

Since the successful market launch the U-mats belong to our standard delivery program. Of course U-mats can also be installed in already operating LIWELL® - screening machines.

„U-Mats“

Laterally drawn up LIWELL® synthetic screen panels
